DETAILED ACTION

Claims 1-12 and 22 are currently pending in this application.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper time wise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 22 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 11 of U.S. Patent No. 6,699,887 B2, since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are drawn to the same art recognized subject matter. A reference anticipating one set of claim will render the other obvious and it would have been obvious to one of ordinary skill in the art at the time of the invention was made since US Patent No. '887 teach the generic compounds of the instantly claimed composition. The instant claims differ from the reference by reciting a specific species and a more limited genus than the reference. The instant compound is so closely related structurally to the analogous compound of the reference as to be structurally obvious therefore in the absence of any unobviousness or unexpected properties. One of ordinary skill in the art would be motivated to prepare the compound since there is an

Art Unit: 1626

exemplary teaching to prepare the claimed compound in the prior art. The motivation to make the claimed compound derives from the expectation that structurally similar compounds are generally expected to have similar properties and have similar utilities. In re Gyurik, 596 F. 2d 1012, 201 USPQ 552 (CCPA 1979). Applicants should note that a generic teaching is grounds for obvious type double patenting rejection. In looking at the instantly claimed compound as a whole, the claimed compound and its uses would have been suggested to one skilled in the art unless unobvious or unexpected results can be shown.

Allowable Subject Matter

Claims 1-11 are allowable over the prior art
